

FERDOUS MAHMUD AKASH

Front-End Developer · React & TypeScript ferdousm.de@gmail.com • Dhaka, Bangladesh · Open to relocation (Tokyo, Japan) • github.com/ferdous-mahmud • linkedin.com/in/ferdous19

TECHNICAL SKILLS

FRONT-END

Languages & UI: TypeScript, JavaScript, React, HTML, CSS
Patterns: Form validation, controlled components, client/server error handling
Accessibility: Semantic HTML, ARIA attributes, label/input association
Layout: Responsive design, component-based UI structure

TOOLS & WORKFLOW

Build & Version Control: Git/GitHub, Vite, npm
APIs & Data: REST APIs, fetch, JSON
Development: VS Code, Cursor, browser DevTools, CI/CD (Fastlane)

SELECTED PROJECTS

KOTHA — SOCIAL MEDIA PLATFORM

Swift, SwiftUI, REST APIs, WebRTC (2024 – 2025)

- Shipped user-facing feed, chat, and commerce flows for a National ICT Award-winning social platform serving users across Bangladesh.
- Integrated REST APIs and real-time messaging with error handling, offline-aware UI states, and secure checkout.

DEVELOPER PORTFOLIO WEBSITE

HTML, CSS, JavaScript (2024 – 2025)

- Built and deployed a responsive portfolio with semantic HTML, mobile-first CSS, and scroll-driven section animations.
- Implemented smooth in-page navigation and intersection-observer effects for accessible, polished UX.

MSAR AMEN — RIDE-SHARING APP

Swift, SwiftUI, Combine, MapKit, Socket.io (Feb 2024 – Aug 2025)

- Built real-time driver tracking UI with MapKit and Socket.io, including route updates and geofencing with CoreLocation.
- Integrated payment SDK and push notifications for seamless transactions and live ride status updates.

EXPERIENCE

FILESURE

Software Engineer (iOS) *Dhaka, Bangladesh*
(Sep 2025 – Current)

- Built API layer with caching, pagination, and debounced search — cutting API calls by **50%** and bandwidth by **35%**.
- Shipped payment and document workflows with validation, error recovery, and clear user-facing status feedback.

APPSTICK

Software Engineer (iOS) *Khulna, Bangladesh*
(Sep 2023 – Aug 2025)

- Delivered real-time ride-tracking UI with live map updates; reduced memory usage by **40%** via efficient state handling.
- Led feature development, code reviews, and CI/CD automation — reducing release time by **60%** with **70%** test coverage.

EDUCATION

NORTHERN UNIVERSITY OF BUSINESS & TECHNOLOGY KHULNA

B.Sc., Computer Science & Engineering (Sep 2019 – Dec 2023)
CGPA: 3.59 / 4.0 · **Coursework:** Web Development, Data Structures, Software Engineering, Human-Computer Interaction
